

Introduction

Dear KOMODO Investors & Supporters,

As one of the **most active Komodo ambassadors** I am thrilled to join the **2018 Notary Node Elections**. After a fruitful year of already running quality nodes successfully, I am confident that my experience and knowledge will guarantee a reliable continuation of providing security to the Komodo blockchain:

Q: What are Komodo Notary Nodes?

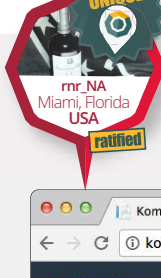

A: Komodo Notary Nodes basically enable all Komodo blockchains' data to be backed up or "notarized" on the ledger of another blockchain. Additionally, Notary Nodes write back the location of all backed-up data to the Komodo blockchain and assetchains.

Combining this process of data notarization with classic PoW (Proof of Work) constitutes Komodo's unique consensus mechanism of dPoW (delayed Proof of Work), adding an extra layer of security to its blockchain and assetchains. dPow ensures that all Komodo blockchains are constantly secured and all history is always accurate, even in the event that its own network(s) would get compromised. Currently all Komodo blockchain data is notarized to the Bitcoin ledger as it provides the largest network and thus the best security. However, this could be easily switched to another blockchain at any time if deemed appropriate. Notary Nodes are incentivized for the work they carry out.

2018 Notary Node Elections

By joining the elections with 2 nodes, 1 in North America (**NA**) and 1 in Asia & Russia (**AR**) both in **UNIQUE locations**, I'm striving to contribute to increase dPoW decentralization, and thus security, as much as I can.

By selecting **EXCLUSIVE locations** I aim to **strengthen the reliability of Komodo's blockchain** instead of just cashing in on incentives. Decentralization is the backbone of any distributed ledger as it provides security for its users:

My Notary Node in **North America** is (already) running on a dedicated server in **Miami, Florida, USA**.

#	NodeName	URL	Pubkey	Region	Location	PGP	BTC Address	BTC Balance	Subsidy (%)	Votes	Ping (< 600 ms)	Uptime

Both are powerful dedicated servers with **unique IP addresses**, equipped with **Intel XEON CPU** and up to **12 cores / 24 threads, 128 GB Ram** and **2 x 480 GB SSD**. Both Notary Nodes were also elected last year and passed the security audits of Komodo's security manager ca333 with excellence.

Nodes and servers are **meticulously monitored** and **kept up-to-date** to ensure the highest availability. Successfully running these nodes for the past year provided me with the experience and knowledge to keep on.

As an **early blockchain supporter**, fanatic **Komodo ambassador** and devoted **Notary Node operator** I believe it is essential to contribute in the most optimal way to help Komodo achieve the success it deserves.

Why vote for the rnr Notary Nodes? What's in it for you?

Besides the proven technical ability of operating Notary Nodes in the most optimal way, the generated incentives empower me to spend a considerable amount of time supporting the Komodo community/investors and promoting Komodo in general. Having assisted with Komodo marketing in the past year, I'm in close contact with many of the team members enabling me to function as a bridge between team and community with first-hand information and support.

My dedicated Twitter account with 3300+ followers at <https://twitter.com/komodonotary> continuously promotes Komodo, sharing the latest news and tech updates, in order to keep the public informed, support the KMD market price and attract new investors.

My service in return for your VOTE2018 coins:

- ✔ **Social Marketing dedicated to \$KMD** in the best interest of Komodo investors
- ✔ **Ensuring high availability** and up-to-dateness of my nodes
- ✔ Act as ambassador to **promote Komodo** and its technologies

I guarantee high quality and reliable notarization based on solid experience:

- ✔ **Excellent result** from ca333's security audits
- ✔ Active with nodes since **KMD „testnet“** before KMD-ICO distribution
- ✔ Up & running **Notary Nodes on real existing locations**
