

CHAINMAKERS

NOTARY NODE PROPOSAL

WHY CHAINMAKERS?

As the Komodo Platform expands there is a growing niche that will cater to businesses and small projects who want to launch their own parallel chains on the platform. Current blockchain application platforms suffer from multiple deficiencies. Ethereum, EOS, and others all suffer in one way or another from centralization, security flaws, and an inherent dependency on the platform's currency. The time has come to utilize the Komodo Platform's solutions to these problems, and take blockchain technology to the next level.

Chainmakers resonates with the Komodo community spirit. We believe that Komodo Assetchains give people and businesses freedom by providing independence, privacy, decentralization, flexibility and security.

MAIN GOALS

The plan is to fill the gap by setting up the first company built on top of Komodo technology. We will offer the following services:

- Komodo parallel chain creation
- Wallet customization
- Block explorer
- BarterDEX integration
- dICO consulting
- Infrastructure setup
- Convenient payment plans

WHO ARE WE?

Currently the team is small but experienced. We are BarterDEX and tradebots specialist that have been part of the Komodo community for 1 year but have been in the Cryptocurrency ecosystem for more than 6 years. We have successfully assisted in the creation of multiple parallel chains on Komodo including COQUI, BEER, PIZZA, UTRUM, and our own ChainMakers blockchain, CHAIN. Some of our advisors include senior Komodo team members who believe in our ideology.

THE PLAN

ChainMakers will become the first decentralized company built on the Komodo Platform and will initiate the CHAIN Assetchain. We have short, medium a long term goals regarding Assetchain streamlining and Komodo Platform scalability. We see CHAIN as an important part of the whole ecosystem's future growth. We will release a detailed revenue distribution calendar at a later date.

WHY VOTE FOR CHAINMAKERS?

- Among first 20 people in the world to make atomic swaps
- Senior community members
- Create opportunities for the community and facilitate growth
- Voters will receive an airdrop of 10% of CHAIN assets

REVENUE DISTRIBUTION

CHAIN SUPPLY
999,999

INVESTORS
10%

OWNERS
80%

VOTER AIRDROP
10%

MULTISIG KMD WALLET CONTROLLED BY OWNERS

REVENUE - EXPENSES = PROFIT

CHAINMAKERS BLOCKCHAIN SPECIFICATIONS

Ticker: CHAIN

Supply: 999,999

Type of coin: Komodo parallel chain

Algorithm: Equihash

Consensus: dPoW

VOTE INSTRUCTIONS

Users will receive their airdrop of VOTE coins. The ratio is 1:1 with KMD. You will receive an airdrop as long as you hold KMD in a wallet you control. After the snapshot and airdrop users can access the VOTE Chain in Agama.

Each user will receive VOTE tokens prior to the election. When the VOTE tokens are distributed, you can vote by sending the coins to the candidate's respective address. Each Zone has an address and below are my addresses divided by zones.
