DECKER

NOTARY NODE CANDIDATE
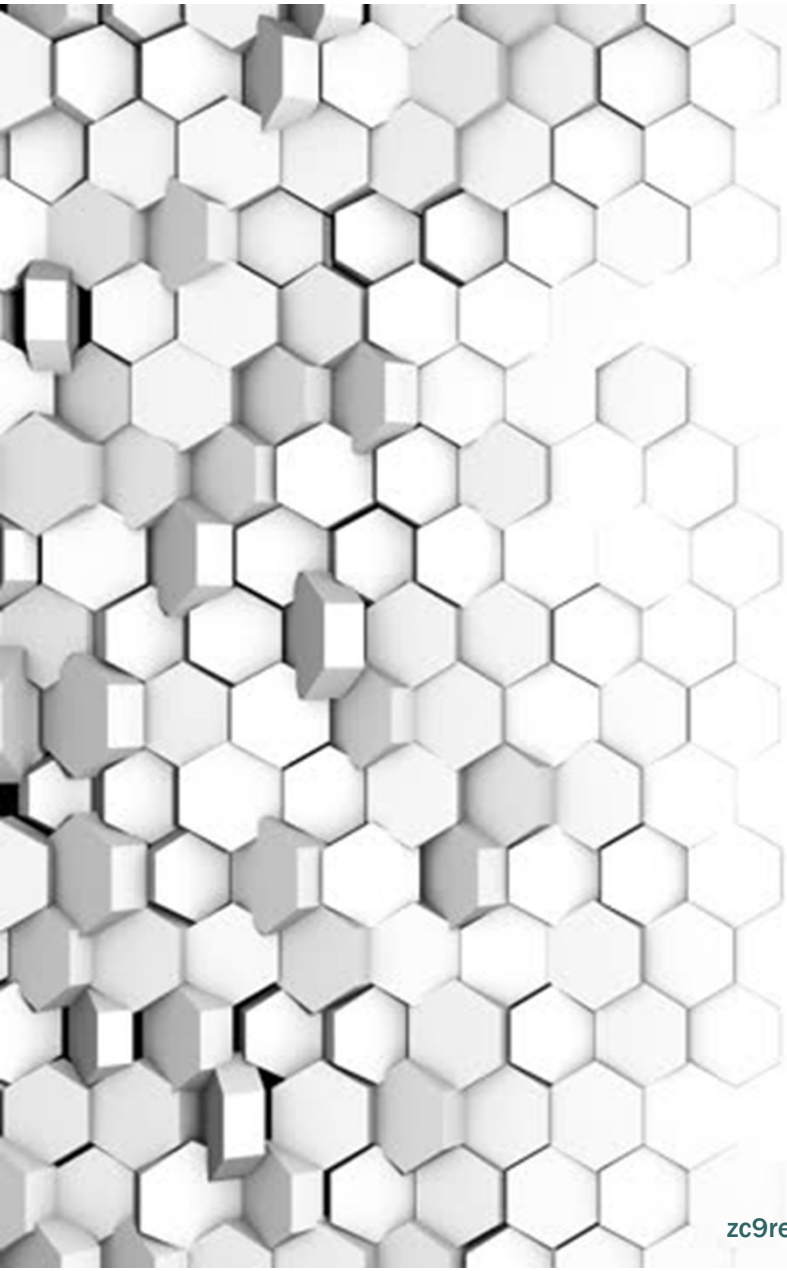

Who am i?

I am an IT expert and systems engineer. I've formed part of the Komodo team since 2017. During which time I contributed to Komodo in the form of development towards the **Komodo-QT** (KomodoOcean) wallet - the world's first GUI wallet for a zero knowledge fork that supports KMD and all its parallel chains. Additionally I assist the team in testing and development of new dapps.

Why Vote for Decker?

In addition to the wallet development I took part in the creation of the first CHIPS wallet, building BarterDEX core for Windows. Active member of the community with plans to support the platform in the long term. Notary node funds will increase my resources to improve Komodo dapps.

Proven Skills

- I can handle a wide spectrum of the Komodo infrastructure.
- Deployment and support fail-safe work of KMD and parallel chain explorers, hosted on my own VDS servers.
- Software testing, software programming.
- Making blockchain snapshots, writing and translate documentations for users.

I've decided to become a candidate for the European region and I count on your support!

Notary Node (Server Configuration)

- Supermicro SYS-1018R-WC0R ([SuperServer 1018R-WC0R](#))

- 2 x Intel Xeon E5-2620v4 2S **8C16T** 2.1-3.0GHz 20MB 85W 14nm FCLGA2011-3 CM8066002032201 (32 threads summary)

- 2 x 32Gb DIMM ECC Reg PC4-17000 CL15 2133MHz RAM

- 1 Tb SSD + 2 Tb HDD (both in RAID)

- Location: **Tier III** Level Data Center (need enter into a contract for collocation, in case of victory in elections), Guaranteeing **99.982%** availability.

Modern server equipment, placement NN in Tier III class data center and skilled tech NN owners - is a guarantee of Komodo Network stability.

Let's do it together! Your vote can be decisive!
