

**DWY**

Notary Node EU Candidate

# Why should you Vote for me ?

64

is the number of Notary Nodes. The Komodo platform is focused on decentralization : dPOW, DEX, yet most of other candidates are applying for 4 regions. Where's the decentralisation if less than 20 people are in charge of all of them. Participate in decentralization : vote for unique candidates !

Most of Notary Nodes are held by official members of KMD team, and SuperNET partners. This ensures stability, but limits agility . This ecosystem needs «fresh blood» and that's the purpose of elections : make evolution and growth of the system faster and stronger.

Technical skills are mandatory to be a good operator. Having more than 10 years of experience in IT as system engineer, I believe I can participate and use my knowledge to refine it.

Reliability is key : My node is hosted at a top rated datacenter provider. Specs are complying with Notary Nodes requirements : SSD, 64GB Ram, 4 cores, 250Mbps bandwidth.

30% of mining rewards will be shared among voters every quarter. The more you vote Dwy, the more you'll get from airdrops !

# Information for voters

Election will occur in March 2018. Each KMD holder will receive VOTE tokens, allowing them to vote for the candidate of their choice by sending those tokens to the candidate address.

Europe Address
